07/29/2020

American Honda Motor Co.

Manufacturer Safety-related recall issued

- NHTSA #20V-440
- Recall #Y7Y 2019-20 Multimodel Front Control Box
- OTA Update Noncompliance
- Status: Remedy Available

Locate an authorized [Honda dealer](#) to obtain more information about this recall

- [Learn more about this recall](#)

Description: American Honda Motor Co., Inc. (Honda) is recalling 2019-2020 model year Odyssey, 2019-2020 model year Passport, and 2019-2021 model year Pilot vehicles. Many in-cabin system interfaces are linked to a central network, including the instrument panel, display audio, and rearview camera display. Due to inappropriate software programming, several errors in the central network may occur that either delay or prevent the rearview camera image from displaying.

A delayed or inoperative rearview camera display does not comply with requirements of FMVSS No. 111, and can reduce the driver's view of what is behind the vehicle, increasing the risk of a crash.

Remedy: Registered owners of all affected vehicles will be mailed instructions on how to download and install the software programming updates for free. Registered owners may also visit an authorized Honda dealer, and the dealer will update the software programming for free. For additional questions or to get help locating a dealer, owners may contact American Honda's Customer Support & Campaign Center at 1-888-234-2138.

American Honda Motor Co.

Manufacturer Safety-related recall issued

- NHTSA #20V-439
- Recall #T89 2018-21 Multimodel Gauge Control
- Module SW Update Noncompliance
- Status: Remedy Available

Locate an authorized [Honda dealer](#) to obtain more information about this recall

- [Learn more about this recall](#)

Description: American Honda Motor Co., Inc. (Honda) is recalling 2018-2020 model year Odyssey, 2019-2020 model year Passport, and 2019-2021 model year Pilot vehicles. Many in-cabin system interfaces are linked to a central network, including the instrument panel, display audio, and rearview camera display. Due to inappropriate software programming, increased data traffic on the central network may exceed the computing threshold of the instrument panel control module. Once exceeded, the instrument panel cannot display certain information required by FMVSS 101; Controls and Displays, such as the engine oil pressure, speedometer, and gear selector position until the next ignition cycle. An overloaded instrument panel control module also prevents the rearview camera image from displaying, which does not comply with the requirements of FMVSS No. 111; Rear Visibility.

Vehicle operation without a functional instrument panel or rearview camera display increases the risk of a crash.

Remedy: Please call any authorized Honda dealer and make an appointment to have your vehicle repaired. Your dealer will reprogram the instrument panel control module for free. For additional questions or to get help locating a dealer, owners may contact American Honda's Customer Support & Campaign Center at 1-888-234-2138.

Glossary

Airbag Deployment

Occurs when the driver, passenger or side airbag has been used or deployed during a crash or other incident. If an airbag has been deployed, it must be replaced by a qualified technician. Have this car inspected by a mechanic prior to purchase. Use [CARFAX Airbag Tips](#) to make sure this vehicle's airbag system is functional.

Damage Indicator

Damage can be a result of many different types of events. Examples include contact with objects (other cars, trees, traffic signs, road debris, etc), vandalism, or weather-related events. Not every damage event is reported to CARFAX. As details about the damage event become available, those additional details are added to the CARFAX Vehicle History Report. CARFAX recommends that you have this vehicle inspected by a qualified mechanic.

- This CARFAX Vehicle History Report is based only on information supplied to CARFAX and available as of 10/14/20 at 9:04:37 AM (CDT). Other information about this vehicle, including problems, may not have been reported to CARFAX. Use this report as one important tool, along with a vehicle inspection and test drive, to make a better decision about your next used car.

First Owner

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Manufacturer Recall

Automobile manufacturers issue recall notices to inform owners of car defects that have come to the manufacturer's attention. Recalls also suggest improvements that can be made to improve the safety of a particular vehicle. Most manufacturer recalls can be repaired at no cost to you.

Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Salvage Title

A Salvage Title is issued on a vehicle damaged to the extent that the cost of repairing the vehicle exceeds approximately 75% of its pre-damage value. This damage threshold may vary by state. Some states treat Junk titles the same as Salvage but the majority use this title to indicate that a vehicle is not road worthy and cannot be titled again in that state. The following eleven states also use Salvage titles to identify stolen vehicles - AZ, FL, GA, IL, MD, MN, NJ, NM, NY, OK and OR.

Title Issued

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.

Total Loss Vehicle

An insurance or fleet company declares a vehicle a total loss when a claim exceeds approximately 75% of its pre-damage value or if the vehicle is stolen and not recovered. This damage threshold varies by company. These companies typically take possession and obtain the title. Not all total loss vehicles result in a DMV-reported branded title. This may occur when an insurance company's definition of a total loss is different than the state DMV's definition for a branded title or when the owner of the vehicle is a self-insured company, like a fleet or rental company.
